# CREW-NEWS

## THIS WEEK!

### Spare Parts

It's mowing season again. Time to check oil levels and the condition of routine wearing parts. If any are found to be worn or damaged they should be replaced. This will prevent additional wear and stress on a machine that could lead to more major (expensive) issues such as metal fatigue and cracking. In addition to providing a safe working environment for the operator which is an important part of any businesses OHS policy.

Hint: A flail should be replaced when the wearing area is down to the bottom of the central stiffening rib. An unbalanced rotor makes vibrations and abnormal noise.

Greasing is also a very important part of the maintenance and servicing of any machine. The guarantee of a long working life of a machine will be aided by rigorously observing greasing frequencies.

Stocker-crew stock and supply a wide range of spare parts to keep your machinery running effectively and safely.

Call us for further information, visit [www.stockercrew.com.au](http://www.stockercrew.com.au).
