Diameter branches max 100mm
Speed 60 cuts/min

*A clean cut,
ecologically friendly
and safe with no
risk of projections*

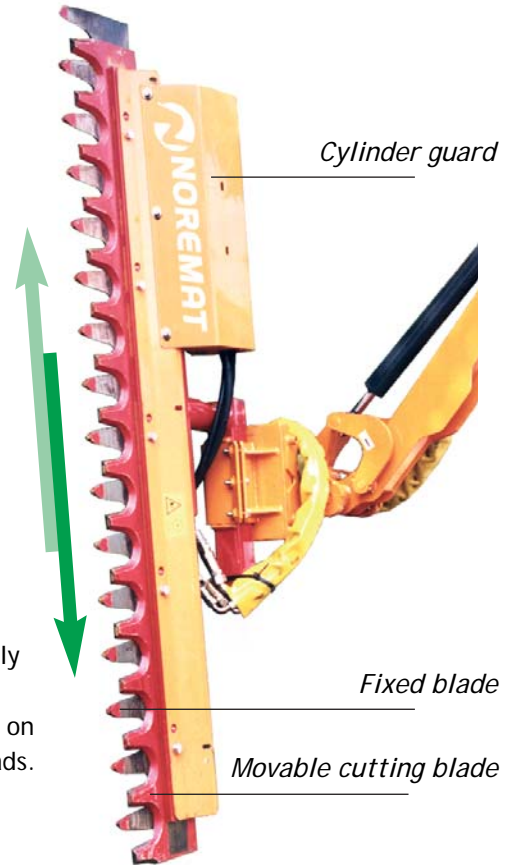

The pruner is a tool recommended in urban areas, due to its low noise level. It is also recommended on busy roads because its operation does not generate projections. It is ideal for pruning hedges or small diameter branches.

Pruning with secateurs does not hurt the tree and allows rapid healing of the vegetation.

The perfect tool for hedges, especially in urban areas or on busy roads.

Benefit from unique services of a specialist in the field - Noremat
