

Give ditches a new life !

The ditch-cleaner helps ditches play their role : make it easier for the water to flow, in order to keep the road as dry and safe as possible.

After a rain-storm, or in autumn, ditches are often filled with leaves, soil and grass.

The ditch-cleaner is easy to use, removes material from the ditch and give it a nice and clean profile.

Ditch-cleaner can be easily fitted to Noremat machines Tonica, Optima, Magistra and Maxibra, through the quick-coupling system.

Technical data :

Working diameter :	670 mm
Maximum working depth (hard soil)	100 mm
Exhaust cover adjustment	0/30°
Ejection distance	2.5 / 15m
Rotating speed of rotor :	410 / 625 tr/min
Minimum oil-flow :	65 l/min
Maximum oil flow :	100 l/min
Working pressure	200 bar.
Power :	45 CV
Weight :	200 kg
