

521M

Professional debris loader

De 521M is a motor propelled suction unit that can be easily attached to a trailer or pickup. Assembling and disassembling is possible without tools. This makes the 521M a flexible deployable machine that can be easily taken to the job.

The design is focussed on a long life. The V-belts prevent damage to the engine as the turbine is unexpectedly blocked by any obstacle. Turbine and housing are made of durable materials. All together, these unique points make that the 521M will run for many years.

Specifications	521M
Driving	
Motor	Honda, air cooled, GX390, 4-stroke
Starting system	Recoil starter
Nominal power (according CE)	9,5/13,0 kW/HP
Fuel	Petrol, unleaded
Tank capacity	6,5 l.
Frame	
Material	Steel box profile
Turbine	
Construction turbine	8 mm. hardox
Construction turbine housing	6 mm. hardox
Suction hose	
Material	Reinforced UV-resistant polyurethane
Dimension	Heavy duty, Length 3,3 m., Ø 200 mm
Air outlet	
Type	360° turnable with flap
Dimension	Ø 150 mm
Dimensions	
Weight	145 kg
Length	78 cm
Width	118 cm
Height	126 cm
Noise level	
At user (LpA)	91,2 dB(A)
