

570PTO

PTO driven vacuum unit

The 570PTO is a vacuum unit to do a lot of work with. It is PTO driven and with the 3-point linkage easily to connect to any tractor with 40 HP and more.

Due to a turnable exhaust and a long hose, the 570PTO lets itself position well to the job.

The designed is focussed to a long life. The indirectly driven turbine is connected to the PTO over v-belts. These protect tractor and PTO at sudden blocks of the turbine. Turbine and housing are made of durable materials.

Specifications	570PTO
Driving	
PTO	540 RPM clockwise in propelled direction when rear mounted
PTO-shaft	Standard without free wheel
Minimum PTO power	40,0/30,0 HP/kW
Frame	
Construction frame	Steel box profile
3-point linkage	Category I and II rear mounted
Parking stand	Sub frame
Turbine	
Construction turbine	10 mm. hardox
Construction turbine housing	16 mm. hardox
Suction hose	
Material	Reinforced UV-resistant polyurethane
Dimensions	Heavy duty, Length 3,3 m., Ø 300 mm
Air outlet	
Type	360° turnable with flap
Dimensions	Ø 300 mm
Dimensions	
Weight	325 kg
Length	105 cm
Width	90 cm
Height	210 cm
