

B10

Compact PTO driven blower

The turbine is made of light weight aluminium, the housing of durable sheet steel. This blower can withstand a few nocks while the weight remains low. The housing has standard a remotely controlled vertical air guidance flap.

The blower can be mounted on tractors starting at 10 HP PTO power.

Specifications

B10

Driving

PTO	540 RPM clockwise in propelled direction when rear mounted
PTO-shaft	Standard without free wheel
Minimum PTO power	10,0/7,5 HP/kW

Frame

Construction frame	Sheet steel with steel box profile
3-point linkage	Category IN, I and II rear mounted
Terrain-adapting undercarriage	N.A.
Parking stand	Support legs

Turbine

Construction turbine	Die cast aluminium, single sided open
Construction turbine housing	Sheet steel
Intake	Single sided
Air control	Vertical air guidance flap remotely controlled

Dimensions

Weight	67 kg
Length	48 cm
Width	94 cm
Height	81 cm
