

B10H

Sturdy professional hydraulic blower

The turbine is made of light weight aluminium, the housing of sheet steel. This blower can withstand a few nocks while the weight remains low.

The housing has standard a remotely controlled vertical air guidance flap.

The blower can be mounted on practically any vehicle with a hydraulic system.

Specifications	B10H
Driving	
Motor	Hydraulic gear motor
Pump capacity	28 l./min. at 175 bar
Control	Standard with flow control valve
Safeguard	Standard with non return valve
Connection	1x DA valve + pressureless return (Transport rate excl. 3 hoses)
Turbine	
Construction turbine	Die cast aluminium, single sided open
Construction turbine housing	Sheet steel
Intake	Single sided
Air control	Vertical air guidance flap remotely controlled
Mounting	2 mounting strips, excl. supporting legs
Dimensions	
Weight	72 kg
Length	48 cm
Width	63 cm
Height	85 cm
