

## B60

### Powerful high capacity blower

The B60 is based on the B40. With the same construction style as the B40, the B60 has the same advantages. The high speed turbine requests more power and has more capacity as in the B40.

Identical to the B40, the B60 is available with 540 or 1000 RPM PTO (counter-) clockwise, thence also suitable for front mounting.

Specifications	B60
<b>Driving</b>	
PTO	540/1000 RPM (counter-) clockwise in propelled direction when rear or front mounted
PTO-shaft	Standard without free wheel
Minimum PTO power	60,0/45,0 HP/kW
<b>Frame</b>	
Construction frame	Steel
3-point linkage	Category I and II rear or front mounted
Terrain-adapting undercarriage	Standard
Parking stand	Support leg
<b>Turbine</b>	
Construction turbine	Sheet steel, double sided closed
Construction turbine housing	Sheet steel
Intake	Double sided
Air control	Vertical air guidance flap
<b>Dimensions</b>	
Weight	278 kg
Length	130 cm
Width	96 cm
Height	120 cm
