

VT420

Compact high tipping vacuum sweeper

De VT420 is a compact vacuum sweeper with a high tipping container of 4.2 m³. With a low total weight and a low centre of gravity, this trailer is ideally combined with compact tractors from 45 hp and more.

The turbine offers lots of power. Because it is made of durable steel, it has a long life.

The VT420 comes standard with a 1.7 meter vacuum funnel with a weight transfer system. It is because of this system that the funnel is best capable of following the terrain without damaging it.

The VT420 can be equipped with several options like a manual suction pipe, a scarifier and a flail mower. With both the scarifier and the flail mower, the material is collected in the same pass. Therefore the VT420 is versatile and almost year round deployable.

Specifications	VT420
Frame	
Drawbar	Adjustable drawbar
Brakes	Unbraked, optional hydraulic or overrun brakes
Tyres	15.0 x 17 line profile RIB
Turbine	
Construction turbine	12 mm. hardox
Construction turbine housing	Double isolated with 3mm wearing plates.
Funnel (standard)	
Working width	170 cm
Transport width	187 cm
Brush shaft	6 brush strips, hydraulic propelled
Scarifier (option)	
Working width	170 cm
Transport width	187 cm
Scarifier shaft	Hardox, 36 knives, mechanic propelled
Flail shaft	J-flails, mechanic propelled
Dimensions	
Net weight	1.850 kg
Length	475 cm
Width	187 cm
Height	230 cm
Container	4,2 m ³
