

VT550

Compact multifunctional vacuum trailer

The VT550 is a vacuum trailer for maintenance of parks, plantations, sports fields, golf courses and public roads. A container of 5.5 m³ and a low own weight makes it possible to use the trailer on compaction sensitive soils.

The VT550 tilts hydraulically and has an automatic opening tailgate. Turbine and housing are made of durable materials.

Several options are possible, like a suction hose with an oscillation system for leafs on the road sides, a funnel of 1.7 meter wide for sports fields, golf courses and parks and a scarifier shaft to scarify and clean in one shift. With these options, the VT550 is from spring to winter deployable.

Specifications	VT550
Frame	
Drawbar	Upper- or lower drawbar
Brakes	Hydraulic-, pneumatic- or overrun brakes
Tyres	15.0-55/17 or 500/50 R 17
Turbine	
Construction turbine	10 mm. hardox
Construction turbine housing	16 mm. hardox
Suction boom with oscillating system (option)	
Side shift	100 cm
Height lift	50 cm
Oscillating system	Standard with hydraulic motor
Suction hose	Super duty Ø 300 mm
Funnel (option)	
Working width	165 cm
Transport width	203 cm
Brush shaft	6 brush strips, hydraulically driven
Scarifier (option)	
Working width	165 cm
Transport width	203 cm
Scarifier shaft	Hardox, 36 knives, mechanically driven
Dimensions	
Net weight	1.900 kg
Length	515 cm
Width (standard/funnel/boom/funnel+boom)	167/179/190/203 cm
Height (standard/boom)	243/295 cm
Container	5,5 m ³
