

VT850

Sturdy vacuum trailer

The VT850 is a vacuum trailer for maintenance of parks and public roads. Due to the sturdy structure and the big container, this is the most suitable container for communities and contractors to clean urban areas of leaves and debris.

The container is short and high to keep the overall length and width small. The container tilts hydraulically and has an automatic opening tailgate. Turbine and housing are made of durable materials.

Several options are possible, like a suction hose with an oscillation system for leaves on the road sides, a funnel of 2.0 meter wide for sports fields, golf courses and parks and a scarifier shaft to scarify and clean in one shift. The VT850 is a sturdy all rounder with an extreme long life.

Specifications	VT850
Frame	
Drawbar	Upper- or lower drawbar
Brakes	Hydraulic-, pneumatic- or overrun brakes
Tyres	500-60/22.5 or 500/60 R 22.5
Turbine	
Construction turbine	10 mm. hardox
Construction turbine housing	16 mm. hardox
Suction boom with oscillating system (option)	
Side shift	100 cm
Height lift	50 cm or 130 cm (option)
Oscillating system	Standard with hydraulic motor
Suction hose	Super duty Ø 300 mm
Funnel (option)	
Working width	195 cm
Transport width	223 cm
Brush shaft	6 brush strips, hydraulically driven
Scarifier (option)	
Working width	195 cm
Transport width	223 cm
Scarifier shaft	Hardox, 42 knives, mechanically driven
Dimensions	
Net weight	2.450 kg
Length	565 cm
Width (standard/funnel/boom/funnel+boom)	195/223/206/223 cm
Height (standard/boom)	275/295 cm
Container	8,5 m ³
