

Norematt Professional Reach Mowers

“Grass cutting, scrub clearance and tree pruning with complete confidence!”

The Norematt Reach Mower range is designed to perform the most intensive verge maintenance, with cutting lengths ranging from 4.5m up to an outstanding 8.3m

Norematt's unique patented Visiobra concept gives perfect vision for the operator with the road and the mowing head in the same field of vision; the telescopic section giving perfect control when the mower head extension needs adjustment.

Some of the Advantages of Norematt:

- Hydraulic hoses are easily accessible and enclosed with the arm for protection
- Vertically opening, hinged bonnet gives easy access to the hydraulic valve block which when open does not make your machine wider, which allows safer road-side checks.
- Reversing shock absorber, allows the arm to retract towards the front if any errors occur whilst reversing.
- High-performance steel, the entire machine is made of High Yield steel offering; a lighter frame, increased mechanical capacity and increased impact safety.
