

# Landmaster

## Professional flail mower for heavy vegetation

The Landmaster is specially designed to mow green manure crops and stubbles, which makes it also suitable for maintaining rough terrain.

The Landmaster comes standard with a 3-point linkage for front- and rear mounting. A double or front trailed linkage is optional. With the front trailed linkage, the machine acts in the front as a trailed machine. With this option is a higher working speed possible.

Specifications	240	275	310
Chassis			
Category	II/III		
Mounting	Front or rear mounted		
Safety break back system	Not possible		
Side shift	Michanical by linear guidance, optional hydraulic		
Max. displacement (cm)	60		
Max. reach relative to axis tractor (cm)	166	201	192
